

REPORTED CRIME INDEX OFFENSES¹ (2004)
Data used for this report was compiled on 3/30/2005

Methodology

The Kansas Bureau of Investigation (KBI) compiled the following 2004 statistical crime report based on data submitted by local and state law enforcement agencies prior to 3/30/2005.

The data represents the most accurate information available, reflecting crime as reported by law enforcement agencies through the Kansas Incident Based Reporting System (KIBRS).

This system enables crime information from standard offense and arrest reports to be reported by the responsible law enforcement agencies. This report does not represent all criminal incidents committed throughout the State of Kansas, as it is dependent on victims reporting crimes to law enforcement agencies and on these agencies submitting incident reports to the KBI. Only reports that were submitted to the KBI were calculated for this report.

This information is designed to support the *Crime in the U.S.* report published annually by the FBI. However, the FBI excludes certain data when fluctuations fall outside of their mathematical equations, resulting in slightly different numbers¹ than reported here.

Data are gathered by one of three ways:

1. **Manual.** Reports are mailed from law enforcement agency to the KBI and the data is entered manually by KBI staff into the KIBRS system. These reports must pass a variety of edits in order to be accepted by the system.
2. **Electronic.** Agencies that have passed a certification process may submit their reports directly into the system through an electronic gateway. These reports must also pass a series of edits in order to be accepted by the system.
3. **Direct.** Direct reporting, more commonly called summary reporting, involves an agency merely providing the KBI with a count for each crime. This form of reporting is dependent on the agency making proper classification of offenses and does not provide any additional information regarding a case. Direct reporting data was collected on an annual basis for 2004.

The following factors should be considered when viewing this data:

1. Prior to 2004, population counts for agencies that did not submit data were included in the totals. This resulted in the rate-per-1,000 statistics appearing lower than they actually were. Beginning in 2004, the population for agencies that did not submit data was taken out of the total column and placed beside the name of the agency.
2. Prior to 2004, entries for law enforcement agencies that did not submit data were listed with zeros. No distinction was made between a jurisdiction having no crime and one that failed to report. Beginning in 2004, this report clearly indicates which agencies had zero crime and which agencies did not submit complete data. This distinction is made through the use of a "Zero Report" which allows law enforcement agencies to explain why no reports were filed in a given month. If an agency does not submit offense and arrest reports or a zero report, they are listed as not having complete data for that month.

The final responsibility for data submissions rests with the individual law enforcement agency. Although the KBI makes every effort through its editing procedures, training practices, and correspondence to ensure the validity of the data it receives, the accuracy of the statistics depends primarily on the adherence of each contributor to the established standards of reporting.
