RE: Sedation "LEVEL II P" Permit course approval with conditions on the dentist, Continuing Education Approval

Dear Mr. Dalhouse,

The Kansas Dental Board's sedation course review member has approved your application for continuing education credit for the following course and has approved the course for Kansas dentists as meeting the standards required for training for a **Level II permit for patients 12 years of age or younger (Level II P) for dentists who have completed a CODA approved Pediatric dentistry post graduate program.** The course is approved for a **Level II P permit for dentists who are NOT trained pediatric dentists if those dentists also meet the requirements for a regular Level I permit by training or by grandfathering:**

"Contemporary Sedation of Children for the Dental Practice: Enteral and Parenteral Techniques"

The Board has approved this course for **19 hours** of CE. You must give certificates to those attendees **UPON COMPLETION** of the course. Without a certificate of completion, the Kansas Dental Board will not recognize the continuing education. You may reference the number above on your certificate for identification.

You might be interested to know that the Kansas Dental Board does accept any continuing education approved by the ADA Continuing Education Recognition Program (C.E.R.P). In order to receive approval as an ADA CERP provider you must contact the American Dental Association, Continuing Education Recognition Program. Their address is 211 E. Chicago Ave., Chicago, IL 60611. They also have a web site available at <http://www.ada.org>.

Sincerely,

Vanda Collins *BW*

- If this course is approved, the Kansas Dental Board may make information about the approval of, and contacts for this course available on the Board web site or in other communications.
 - If the course content changes substantially in the future, you must send an agenda or course outline, with a copy of this original application or the approval letter you received from the Kansas Dental Board, with a summary of changes made.
 - Notify the Kansas Dental Board when you discontinue this course.
- Attach agenda or course outline and return this completed application to the Board.**

**Contemporary Sedation of Children
for the Dental Practice: Enteral and
Parenteral Techniques**

**Oct. 22-24, 2010
San Diego, Calif.
The Westin Gaslamp Quarter Hotel**

CE credit: 19 hours

Course Director
Stephen Wilson, D.M.D., M.A., Ph.D.

Invited Speakers
Ronald Kosinski, D.M.D.
Alan Milnes, D.D.S., Ph.D.
David Rothman, D.D.S.

Course Summary
The sedation course is intended for pediatric dentists who have had training in sedation techniques during their graduate or residency training programs. Although the course involves a series of lectures on key topics associated with sedation (e.g. monitoring of the patient), materials are provided that include a narrative on issues such as child personality and selection of drugs and a reference list.

The course is consistent with the ADA's Guidelines on Teaching Pain Control and Sedation to Dentists and Dental Students in a Continuing Education Program. The level of the course, according to the ADA's Guidelines, Part II, Definitions, Education Courses, is that of a survey course and does not offer direct, clinical patient management.

• This course may be used towards meeting the requirements for certification/recertification in the State of California. The AAPD is a recognized provider for continuing education under permit 2272 from the State of California.

Objectives

Upon completion, the participant should be able to:

- Describe the pediatric anatomy and physiology of the respiratory, cardiovascular and central nervous system related to sedation.
- Describe the commonly observed pharmacological effects of sedative agents used in pediatric sedations.
- Describe the appropriate physical assessment of the pediatric patient including risk assessment.
- Choose appropriate sedative(s) for the individual pediatric patient based on behavior, temperament and dental needs.
- Describe and discuss guidelines associated with the sedation of pediatric patients.
- Describe the use of nitrous oxide when used in combination with other sedative agents for use in pediatric patients.
- Discuss the advantages and disadvantages of sedation and consider alternatives.
- List the complications associated with sedation of the pediatric patient.
- Discuss the prevention, recognition and management of these complications.
- Discuss the pharmacological effects of combined drug therapy, their implications and management.

Schedule

Please visit the AAPD Web site to view complete course schedule, register online and make hotel reservations at <http://www.aapd.org/events>.

Location

The Westin Gaslamp Quarter Hotel
910 Broadway Circle
San Diego, CA 92101
(619) 239-2200
